Cultural Instructions

When received plants should be placed in a vat of water for 2 or 3 hours, then cleaned with a strong stream of water and a pair of tweezers. They should be set in good sandy clay loam to which a very small amount of slacked lime has been added, if soil does not contain lime. If roots interfere in potting, they may be removed. In case roots are cut off dry thoroughly in hot sun or in any dry hot atmosphere after removing and reset on a small pocket of sand. If any plant shows decay, cut out the bad tissue and place in hot dry position. They transplant at any season, but much better in the hot summer months. If set outdoors they should have a well drained position or if potted the pot should be $\frac{1}{2}$ full of rocks. They will not stand wet, soggy soil. All plants are named on tag and color, shade or sun indicated. The plants in this shipment are not nursery grown. They are shipped as removed from natural position where they have been subject to zero temperature. They stand hard freezing without injury but will not stand too much water. They are shipped rough, as in cleaning they absorb their weight in water and make excessive carrying charges. All orders shipped same day received. I sell to the trade only.

Mr. E. C. Auchter,
Washington D.C.

Dear Sir:

I do not issue a catalogue, as
I feel proprietary to the Florist trade,
and keep my overhead down in order to
give them the benefit of lower prices.
To colleges and municipal parks
etc the price is materially reduced
and in some instances no charge is
made at all. To common schools
plants are furnished free when postage
to cover mailing is sent with order.

Yours truly
Guy Quinn
